

Pre-Move and Post-Move Inspections

(For Buildings Moved In)

A **Pre-Move** Inspection:

- Identifies what items need to be corrected in order to bring the building up to NBC minimum standards. Note that many existing homes do not meet Code.
 - According to *The Uniform Building and Accessibility Standards Act*, Section 7(1) states:
Subject to subsections (2) and (3), the owner of each building in Saskatchewan shall ensure that the building is designed, constructed, erected, placed, altered, repaired, renovated, demolished, relocated, removed, used or occupied in accordance with the building standards.
 - Once any structural change is made to a building (i.e. relocation) the building standards apply. The Pre-Move inspection identifies what these NBC requirements are so that the owner can make an informed decision before purchasing and/or moving the building.
 - The pre-move fee is a small price to pay if an owner learns that it will cost thousands (if not tens of thousands) of dollars in upgrades once moved in order to meet the minimum standards.
- Determines if the structural integrity of the building can withstand the move.
- Confirms if the building meets the bylaws of the municipality it is being moved to.
- Communicates to the municipality, through information and photos, so that Council can make an informed decision about approving or rejecting the building.

If it is a newer building that has already had NBC inspections done during the course of construction, then PBI may request and review the inspection reports. If it is a RTM or modular home that was constructed out of province or country, then a compliance certificate issue number (from CSA, Intertek, QAI or equivalent) is required indicating that the home was built to CSA-A277 standards.

If approved by Council, a building permit is required for the **Post-Move** inspections:

- **Plan Review** to ensure that the placement of the building on the property meets local building bylaws and NBC requirements. If a deck, attached garage and/or basement development is also being constructed with a dwelling, then a plan review for these projects will be done. These projects are included with the permit only if the plans are provided at the plan review stage. If not, then a separate building permit will need to be taken out for each project built at a later date.
- **Foundation** inspection prior to pouring the concrete foundation walls to ensure they comply with the site-specific, engineer stamped foundation designs (or prior to backfilling if it is a wood foundation.)
- **Anchoring** inspection prior to backfilling to check the anchoring of the building to the foundation.
- **Framing** inspection is required prior to insulating if there is an insulated attached garage or basement development.
- **Occupancy/Final** inspection prior to moving in or sleeping overnight. All NBC life safety items listed in the Pre-Move inspection report and/or Plan Review must be completed before moving in. If all interior and/or exterior work is not yet completed, then a **Final Re-Inspection** will be required in order to close the permit.
